SUBJECT INDEX, VOLUME XIV

Acetylene polymers, effect on rate of polymerization of acrylonitrile and vinyl acetate, 589
Acrylonitrile, effect on polymerization by acetylene polymers, 589

Block copolymers, ethylene terephthalate and polyoxyethylene glycols, 15
preparation, 126

Carboxymethylcellulose, dielectric increment as a function of degree of ionization, 381
Cellulose, hydrolysis, 95
reaction with acetic acid, 535
Cellulose acetate, viscosity, 159
Cellulose fibers, small angle x-ray scattering, 405
thermodynamics of mechanical properties, 341
Cellulose nitrate, solvation in acetone-water mixtures, 129
Chain transfer, in solution polymerization, 489
Chain transfer coefficients, determination, 295
Copolymer composition equation, nomograph, 409
Cotton, Egyptian, acid sensitive linkages, 95
Cotton cellulose IV, preparation from cotton cellulose III, 121
Crosslinking, vinyl polymers, and ionizing radiation, 503

Degradation, vinyl polymers, and ionizing radiation, 503
Deuterium, to determine polystyrene branching, 513
Diallyl phthalate, polymerization, 535
Diffusion, of organic vapors in polymers, water induced acceleration, 321
Diffusion and sedimentation constants relationships for polymer solutions, 193

Electrical properties, polythene, 505
Electrophoresis in solutions of poly-4-vinyl-*N*-*n*-butylpyridinium bromide, 329
Ethylene terephthalate and polyoxyethylene glycols, block copolymers, 15
Extrusion behavior of viscoelastic materials, calculation from relaxation distribution function, 37

Gel formation, by high energy radiation, effect of molecular weight distribution, 547

Infrared analysis, chlorinated natural rubbers, 287
of natural rubber, 181
Intrinsic viscosity, measurement, 307
relation to molecular dimensions, 451
of rod-like macromolecules, effect of rotatory Brownian motion, 212
Intrinsic viscosity-molecular weight relationships, tropomyosins, 512
Intrinsic viscosity distribution vs. cellulose acetate viscosity, 159

Kinetics, polymerization, significance of parameters, 477
vinyl polymerizations, 511

Light scattering, polymethyl methacrylate, 408
thermostat for measurements, 385

Mechanical properties, cellulose fibers, thermodynamics, 341
polythene, 505
Methyl methacrylate, polymerization, 463
Microcrystallite size, determination by small angle x-ray technique in rayons, 403
Molecular weight, by light scattering, effect of small refractive index increment, 310
polystyrene, 124
Molecular weight-intrinsic viscosity relationships, tropomyosins, 512
Molecular weight distribution, effect on gel formation by high energy radiation, 547

Organic vapors in polymers, diffusion by water induced acceleration, 321
Osmometer, high-speed glass, 209
Osmometry, possible errors, 593

Parameters, significance in polymerization kinetics, 477
solvent independent, in the viscometry of polymer solutions, 375
Phase equilibria in polymer-liquid 1-liquid 2 systems, 241
Photometers, light scattering, calibration with Ludox, 29
Polarity in copolymerization, 483
Polar monomers in copolymerization, reactivity, 87
Polyacetaldehyde rubber, 113
Polyampholytes, synthesis, 521
Polyelectrolytes, 329
Polyelectrolyte solutions, dilute, viscosity, 217
Polyisobutylene, birefringence, 443
relaxation distribution functions, 261
rheology, 47
Polymer Symposia, Tokyo and Kyoto, Japan, 1
Polymethyl methacrylate, diffusion of water in, 414
in methyl ethyl ketone, refractive index increment, 309
light scattering, 408
peroxidic, initiation of polymerization, 411
Polyoxyethylene glycols and ethylene terephthalate, block copolymers, 15
Polystyrene, adsorption on charcoal, 583
determination of branching with deuterium, 513
glass temperature and related properties, 315
molecular weight, 124
solution viscosities, 5
Polythene, electrical and mechanical properties, 505
Poly-4-vinyl-*N*-*n*-butylpyridinium bromide, electrophoresis, 329
Proteins, interaction studies with rhodamine-B, 139

Radiation, high energy, effect of molecular weight distribution on gel formation, 547
ionizing, vinyl polymers crosslinking and degradation, 503
Radical polymerization, initiator efficiency, 214
molecular orbital theory of reactivity, 312
termination reaction, 463
Rayons, determination of microcrystallite size by the small angle x-ray technique, 403
swollen in lithium hydroxide solutions, small angle x-ray scattering, 397
Reactivity constants in copolymerization, derivation, 508
Relaxation distribution function, for calculation of extrusion behavior of viscoelastic materials, 37
polyisobutylenes, 261
Reviews

ISSUE NO. 78, DECEMBER

WALL, LEO A., and BROWN, D. W.: Use of Deuterium to Investigate Extent of Branching in Polystyrene 513
VRANCKEN, M., and SMETS, G.: Polymers and Group Interactions. I. Synthesis of Polyampholytes 521
HAWARD, R. N.: Polymerization of Diallyl Phthalate 535
CHARLESBY, A.: Effect of Molecular Weight Distribution on Gel Formation by High Energy Radiation 547
HILLER, JR., L. A.: The Reaction of Cellulose with Acetic Acid 555
KASE, SHIGEO: How to Treat Tensile Data of Rubber. III. Least Squares Adjustment 579
JELLINEK, H. H. G., and NORTHEY, HELEN L.: Adsorption of High Polymers from Solution on to Solids. II. Adsorption of Polystyrene on Charcoal 583
Book Review: Das Makromolekül in Lösung, H. A. Stuart, editor. Reviewed by H. Mark 588
GEORGIEFF, K. K.: The Relative Inhibitory Effect of Certain Acetylene Polymers on the Rate of Polymerization of Acrylonitrile and Vinyl Acetate (Letter to the Editors) 589
BROATCH, W. N., and GREENWOOD, C. T.: Observations on Some Possible Errors in Osmometry (Letter to the Editors) 593
